## System setup

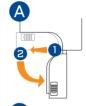

### Removing the covers

Push the left-hand release lever downwards and hold it down to slide the bottom cover off the meter.

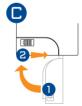

#### 2 Inserting/ replacing the test strip cartridge

Open the lid of the cartridge container by pulling it towards the left and then downwards.

Insert the new cartridge following the direction indicated by the arrows on the cartridge label.

Close the lid of the cartridge container by pushing it in and then sliding it towards the right.

#### 3 Inserting/ replacing the lancet

Extract the lancet holder.

Holding the lancet by the base, insert it into the lancet holder and push it all the way in.

Insert the lancet holder into the meter again.

Remove the lancet cap by twisting and sliding it off.

# Replacing the covers

The top cover has a rubber seal and it must be inserted with the longest edge positioned at the front of the meter

The bottom cover does NOT have a rubber seal and it must be inserted with the longest edge positioned at the back of the meter.
